

International Funds Transfer and Draft Services

International funds transfer and draft service

Computershare's International Funds Transfer and Draft service provides options for international delivery of dividend payments and sales proceeds. Choose check (draft) or international funds transfer (direct deposit or wire) and enjoy access to a wide range of currencies.

After enrolling, your payment preferences stay securely on file for future transactions, and can be reviewed, updated, or changed through our online platform 24 hours a day, 7 days a week.

How do I enroll?

The fastest way is through your online account at www.computershare.com/investor. Navigate to the banking details section of your portfolio and follow the prompts to add payment instructions.

Are there other enrollment options?

If you are unable to enroll online, you may complete and mail an enrollment form. You may download the form at <https://www-us.computershare.com/Investor/#Help/PrintableForms>.

What currencies are available?

International Funds Transfer payments are available in many different currencies.

Available currencies can be found on the enrollment form, which can be accessed at <https://www-us.computershare.com/Investor/#Help/PrintableForms>. Currency availability is subject to change at any time.

How is the exchange rate determined?

Currency exchange rates are calculated using several factors. The foreign exchange rate applied to your transaction will be determined on the date of the foreign exchange transaction. See section 3. **Fees and Timing** from the enrollment form for more details.

Do I need to take any action if I do not want to use this service?

No. No action is needed if you do not want to use the service.

Can I have one payment preference for dividend payments, and sales by another?

Yes. During the enrollment process, you can choose how you want Computershare to use your payment preferences for each payment type.

During the sale process, you will have an opportunity to add or change payment information. For security reasons, adding or changing payment instructions may delay receipt of funds for that sale.

I have a U.S. bank account and wish to receive my dividend payments by electronic funds transfer in U.S. Dollars. What should I do?

Select electronic funds transfer (EFT) as your payment method and provide your U.S. bank account details during enrollment.

Can Computershare deposit my dividend payments in U.S. Dollars electronically at a non-U.S. bank?

Yes, provided this arrangement follows U.S. law, the laws of the receiving country, and your bank's policies. Confirm with your bank before enrolling.

Can I receive my payment in a currency other than the currency of my bank's country?

Yes, when using International Funds Transfer wires, you may receive a different currency if allowed by your bank and consistent with local regulations.

What are the fees and timing for this service?

Fees and timing are as follows:

Payment Method Fees (in USD)

Payment method	Dividend payments	Sales	Approximate timing
International Funds Transfer Direct Deposit	20% of the dividend amount (min \$2.50/max \$5.00)	\$25	1-5 business days, dependent on country
International Funds Transfer Wire	\$10	\$35	1-3 business days, dependent on country
International Draft	\$5	\$25	Dependent on mail delivery

Processing fees are deducted from the proceeds of the payment.

Are there any other fees?

The amount of the fee on a particular foreign exchange transaction may vary, depending on the value of

the payment and/or the currency being purchased. International funds transfer and draft payments including a foreign currency exchange are generally charged a fee up to 3% of the value of the payment. Other charges and additional bank fees, such as lifting fees, may be applied. Contact your local receiving bank to confirm added fees that may apply.

Electronic payments returned due to invalid banking information may incur an added fee, which is deducted from the proceeds of the payment.

What if the fee is more than the actual payment?

Payment instructions will only apply to payments that exceed applicable fees. If the fee exceeds the payment amount, the payment will be made in the Issuer's default payment type- generally a check in U.S. Dollars.

Why is an estimated exchange rate provided rather than the actual rate?

The exchange rate displayed online at the time of your transaction is an estimate for informational purposes. The actual rate applied will depend on market conditions at the time of processing.

I lost my international draft. What should I do? How do I get a replacement?

Contact Computershare so we can place a stop on the draft and issue a replacement payment.

I have uncashed dividend checks - can this service help me replace them?

In some cases, yes. For outstanding checks that cannot be replaced by using Investor Center, contact Computershare for assistance.
